

Ivana Ljubic (ESSEC Business School, France)

Short Biography

Ivana Ljubic is Professor of Operations Research at ESSEC Business School of Paris. Prior to joining ESSEC in 2015, she was appointed at the University of Vienna. She also worked as Visiting Scholar/Professor at the Robert H. Smith School of Business at the University of Maryland, TU Dortmund, TU Berlin, Dauphine University. Research interests and main competences of Ivana Ljubic include combinatorial optimization and optimization under uncertainty. She uses tools and methods of mixed integer (non-) linear programming, meta-heuristics and their successful combinations for solving optimization problems with applications in network design, telecommunications, transportation, logistics, routing and bioinformatics. She has published over 35 articles in leading OR journals, including Management Science, Operations Research, Mathematical Programming, etc. She is member of Editorial Advisory Board for the journal Computers & Operations Research and Associate Editor for the journal Omega. She also served as guest-editor of journals: European Journal of Operational Research and Annals of Operations Research. She currently serves as vice-president of the INFORMS Telecommunication Section.
